Profile App (main code)

```
import 'package:flutter/material.dart';

void main() {
  runApp(cardapp());
}

class cardapp extends StatelessWidget {
  @override
  Widget build(BuildContext context) {
    return
      MaterialApp(
        debugShowCheckedModeBanner: false,
        title: 'FA19-BCS-061',
        home: Scaffold(
          backgroundColor: Colors.deepPurple,
          appBar: AppBar(

            title: Text('Flutter App Developer'),
            backgroundColor: Colors.deepPurpleAccent,
            centerTitle: true,
            actions:<Widget>[CircleAvatar(
              backgroundColor: Colors.white,
              radius: 20.0,
              backgroundImage: AssetImage('images/me.jpg'),

            ),],
          ),
          body: SafeArea(
            child: Column(
              mainAxisAlignment: MainAxisAlignment.center,
              children: [
                CircleAvatar(
                  backgroundColor: Colors.white,
                  radius: 70.0,
                  backgroundImage: AssetImage('images/me.jpg'),
                ),
                Text(
                  'Suleman Anwar',
                  style: TextStyle(
                    fontSize: 40.0,
                    color: Colors.white,
                    fontWeight: FontWeight.bold,
                  ),
                ),
              ],
            ),
          ),
        ),
      );
  }
}
```

```

        SizedBox(
          height: 20.0,
